

Cruise control, functional diagrams

RESUME ← ON → OFF
 ○ OSET
 ■ SPEED

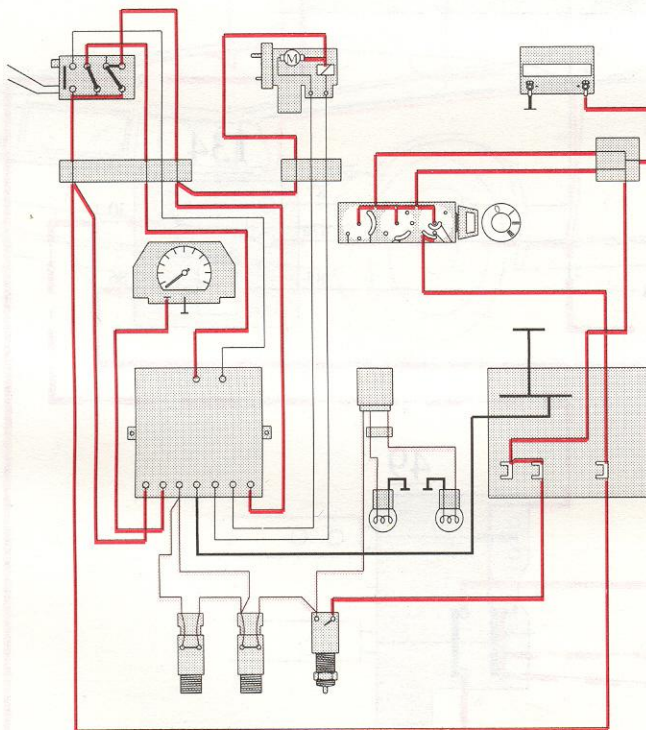

Retention of set speed

Selector in ON position

Brake pedal depressed, opening control unit ground connection.

(The control unit is normally grounded across the brake lights. Operation of the brake and/or clutch pedal opens the ground connection and renders the unit inoperable. The connection is also broken if both brake lights are defective.)

RESUME ← ON → OFF
 ○ OSET
 ■ SPEED

Resumption of set speed

Selector in RESUME position

Car reverts to original speed.
